

SEAL DISTRIBUTORS

The Reconditioning Process

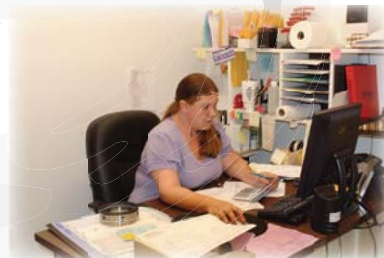

When your order is received, it is assigned an internal tracking number and routed to the repair center.

Upon inspection of the contents, a fax is promptly sent to acknowledge receipt of your seal.

Next, your seal is disassembled and evaluated for the repair or replacement cost.

Once the evaluation is complete, a formal quotation is prepared and sent.

MasterCard, Visa and American Express Accepted

SEAL DISTRIBUTORS

The Reconditioning Process

Production begins promptly after receipt of your order.

Parts are sent to the CAD department for production drawing.

All parts are cleaned.

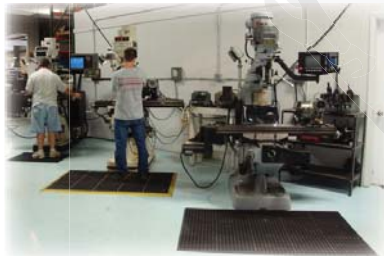

Any lapped surface is checked for flatness and a parallel finish is ensured through the grinding process.

All lapped surfaces are lapped to two helium lightbands.

If required, machine work and parts production can be done in our facility.

MasterCard, Visa and American Express Accepted

SEAL DISTRIBUTORS

The Reconditioning Process

Next, our Seal Technician will re-assemble your seal in our Clean Room.

All assembled cartridge seals are static pressure tested and certified before being packaged for shipment.

Seals are certified and labeled for shipment.

Last, your seal is carefully packaged for safe shipping and quickly sent to your facility.

MasterCard, Visa and American Express Accepted
